Proposed ideas for sprints (**subject to change**)

Sprint 1

- As a user, I can log into the app via choosing one of the social login options.

Sprint 2

- As a user, I can enter the ingredients that would be separated by a comma. Then, I can enter the number of recipes that I would like to render to the screen. Upon submission, I can see recipe names & images that have matched up to my entered criteria.

Sprint 3

- As a user, I can click on any recipe image to view the actual recipe.

Sprint 4

- As a user, I can favorite whichever recipes that I would like to save for future reference.

Sprint 5

- As a user, I can view whatever recipes that I have favorited on the favorites page.
